

You are a database analysis assistant. When answering a user's questions, you must ALWAYS follow this sequence strictly, and you must ALWAYS perform ALL the steps in this sequence:

<start sequence>

1. Call the get-schema tool one time per conversation.
2. Use the table, column, and relationships schema provided in the get-schema tool response, to answer the user's questions.
3. For each of the user's questions, perform the following steps:
 - a. Call the execute-sql tool with a valid SQL query.
 - b. Analyze the data set provided in the execute-sql tool response, to answer the user's question.

<end sequence>

You must apply these rules at all times:

- NEVER guess column names or relationships.
- ALWAYS use the response from get-schema to determine column names and relationships.
- NEVER provide a text-based analysis of the data without first calling execute-sql.

User Question 1: Today's date June 8, 2026. How many assigned assets have a defined return date before today?

```
[Agent calling tool -> get_schema({})]  
[Agent calling tool -> execute_sql({'query': "SELECT COUNT(*) FROM  
Assignments WHERE 'Date Returned' < '2026-06-08'"})]  
[Agent calling tool -> execute_sql({'query': 'SELECT COUNT(*) FROM  
Assignments WHERE "Date Returned" < \'2026-06-08\''})]
```

Agent Answer: There are 339 assigned assets with a defined return date before June 8, 2026.

User Question 2: How many assigned assets have a defined return date after today?

```
[Agent calling tool -> execute_sql({'query': 'SELECT COUNT(*) FROM  
Assignments WHERE "Date Returned" > \'2026-06-08\''})]
```

Agent Answer: There are 0 assigned assets with a defined return date after June 8, 2026.

User Question 3: How many employees have an undefined returned date?

```
[Agent calling tool -> execute_sql({'query': 'SELECT COUNT(DISTINCT  
EmployeeForeignKey) FROM Assignments WHERE "Date Returned" IS NULL'})]
```

Agent Answer: There are 193 employees with an undefined return date for their assigned assets.

User Question 4: How many assets have vendors?

```
[Agent calling tool -> execute_sql({'query': 'SELECT COUNT(DISTINCT a."PrimaryKey") FROM Assets a JOIN Vendors v ON a."PrimaryKey" = v."ForeignKey"'})]
```

Agent Answer: There are 75 assets that have vendors associated with them.

User Question 5: List assets that are assigned to multiple employees.

```
[Agent calling tool -> execute_sql({'query': 'SELECT a.Name, COUNT(DISTINCT r.EmployeeForeignKey) AS EmployeeCount FROM Assets a JOIN Assignments r ON a.PrimaryKey = r.AssetForeignKey GROUP BY a.Name HAVING COUNT(DISTINCT r.EmployeeForeignKey) > 1'})]
```

Agent Answer: The asset named "Tablet-LQ-3447" is assigned to multiple employees, specifically 2 employees.

User Question 6: List employees that have multiple assets assigned to them.

```
[Agent calling tool -> execute_sql({'query': 'SELECT e."First Name", e."Last Name", COUNT(a."AssetForeignKey") as AssetCount FROM Employees e JOIN Assignments a ON e."PrimaryKey" = a."EmployeeForeignKey" GROUP BY e."PrimaryKey", e."First Name", e."Last Name" HAVING COUNT(a."AssetForeignKey") > 1'})]
```

Agent Answer: Here is a list of employees who have multiple assets assigned to them:

- | | | |
|-----------------------------------|---------------------------------|---------------------------------|
| 1. Donna Peck - 4 assets | 22. Joseph Christian - 5 assets | 43. Danny Walker - 4 assets |
| 2. Jeremiah Mills - 5 assets | 23. James Rodgers - 4 assets | 44. Edward Shepherd - 4 assets |
| 3. Michelle Griffin - 6 assets | 24. Bill Reynolds - 3 assets | 45. Jennifer Evans - 5 assets |
| 4. Glenn Jones - 4 assets | 25. Kaitlyn Williams - 5 assets | 46. Perry Carrillo - 6 assets |
| 5. Jimmy Rogers - 5 assets | 26. Andrew Greer - 2 assets | 47. Chery Mack - 3 assets |
| 6. Heather Mccarthy - 4 assets | 27. Kaitlyn Carroll - 5 assets | 48. Joseph Miller - 5 assets |
| 7. Scott Lewis - 7 assets | 28. Karen Castaneda - 5 assets | 49. Ryan Johnson - 7 assets |
| 8. Johnny Miller - 5 assets | 29. Janice Perry - 4 assets | 50. Phyllis Manning - 6 assets |
| 9. Charles Harrington - 3 assets | 30. Ashley Barnett - 3 assets | 51. Veronica Torres - 11 assets |
| 10. Melissa Rodriguez - 6 assets | 31. Barbara Hines - 3 assets | 52. Jorge Murphy - 5 assets |
| 11. Melissa Phelps - 6 assets | 32. Mathew Santiago - 6 assets | 53. Scott Benson - 7 assets |
| 12. Robert Pena - 7 assets | 33. Joshua Knight - 5 assets | 54. Charles Landry - 3 assets |
| 13. Melissa Cannon - 6 assets | 34. Jimmy Cohen - 5 assets | 55. Renee McGee - 6 assets |
| 14. Stephen Turner - 8 assets | 35. Stacey Clark - 7 assets | 56. Rebekah Serrano - 6 assets |
| 15. Howard Richards - 5 assets | 36. Debbie Henry - 4 assets | 57. Mark Perry - 5 assets |
| 16. Matthew Beard - 6 assets | 37. Brian Sparks - 3 assets | 58. Brandon Flynn - 3 assets |
| 17. Samuel Wolfe - 7 assets | 38. Vanessa Larson - 11 assets | 59. Stephen Solis - 8 assets |
| 18. Joshua Hayes - 5 assets | 39. Diane Daniels - 4 assets | 60. Tammy Rivera - 8 assets |
| 19. Christopher Wright - 3 assets | 40. Karen Herring - 5 assets | 61. Angela Black - 2 assets |
| 20. Brittany Rivas - 3 assets | 41. Tyler Johnson - 10 assets | 62. Anne Johnson - 2 assets |
| 21. Curtis Smith - 3 assets | 42. Anthony Mccoy - 2 assets | 63. Marcus Cordova - 5 assets |

Please note that the list includes multiple rows for some employees due to multiple assignments.
